

# 10 THINGS YOU NEED TO KNOW

## GATE SIM CARD

SIM Card is stored in your gate **control board installed** by Killeen Engineering

There is no charge to open your gate using the **standard** key fob / remote controllers supplied with your gate kit as the unit rejects the call to stop a charge

Charges **DO** apply when your are called to open your gate using a GSM as a connection is made e.g. visitor buzzes intercom at entrance

Top-Up is required to keep the SIM **active** - not just for call charges

We Top Up your card with **€10** at the outset. You must top up again **before** 6 months

Download an **app** from your network provider to check your SIM balance

An expired SIM **must** be changed.

Safely switch your gates to **manual with the key provided** if your SIM needs to be replaced

**240 volts!** That's the power going into your control board. **DO NOT** even attempt to change the SIM yourself

Call to schedule an engineers visit to insert a new SIM safely. **Fees apply**
